

Drop Shield

Originally devised by Dr. Hsien Yung Lai in Taiwan, the Drop Shield is a plexiglass barrier that minimizes healthcare workers' exposure to COVID-19. The Drop Shield works by sitting over the head and shoulders of a patient as they are intubated by a provider.

CCI is donating a portion of every sale to the frontline workers' relief efforts.

- Inventory ready to ship
- For single or multiple patient use
- Reduces the need for PPE use
- Clean with bleach, alcohol solution, or Sani-Cloth wipes
